

Phalanx

Peter Martingell

Phalanx is a sleek piece of vector artwork inspired by the greek collections at a plethora of museums. The Visualization features layers of soldiers, with spears held aloft, who are flanked by the artifacts of war. At their feet a band inspired by the pottery patterns so often seen amongst greek collections at museums can be seen.

For the art style I stuck with my style I've slowly and randomly developed over time.

Programs Used: Inkscape

Inspiration: Greek Museum Collections
